

CAPABILITIES STATEMENT

COMPANY OVERVIEW

Attention IT, Inc. develops and maintains eMWaste®, a secure, web based platform used to track and manage nuclear, hazardous, and mixed waste in regulated environments. The platform supports end to end waste lifecycle management, including characterization, storage, transport, and final disposition, while ensuring compliance with applicable regulatory requirements.

eMWaste® delivers centralized documentation, audit ready records, and real time oversight of waste streams to support operational control and regulatory confidence. Attention IT is focused solely on the continued development and support of the eMWaste® platform for organizations where accuracy, accountability, and compliance are critical.

PAST PERFORMANCE

Southern Ohio Cleanup Company (formerly Fluor Corporation)

- Supported operations at the Portsmouth Gaseous Diffusion Plant
- Migrated legacy data into eMWaste®, performed system upgrades, and delivered ongoing customization

U.S. Department of Energy Facilities

- USDOE K-25
- USDOE Environmental Waste Management Facility
- Oak Ridge National Laboratory

Commercial & International Nuclear Organizations

- Ontario Power Generators
- Canadian National Laboratories
- Nuclear Waste Services (UK)
- Magnox Ltd (UK)

CORE COMPETENCIES

Hazardous & Nuclear Waste Management Software

End-to-end cradle-to-grave tracking of nuclear, hazardous, and mixed waste.

Regulatory Compliance Enablement

Automated documentation and configurable workflows to meet federal, state, and international regulatory requirements.

Custom Software Configuration & Enhancement

Tailored modifications to align with client operations, jurisdictions, and reporting needs.

Inventory & Shipping Management

Tracking of containerization, labeling, overpacking, shipping, processing, and disposition.

Secure Web-Based SaaS Delivery

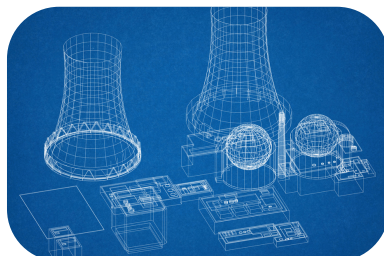

Browser-based platform hosted by Attention IT or deployed within client environments.

Proprietary Waste Calculation Tools

Specialized calculations that are difficult to replicate and critical to waste characterization and compliance.

DIFFERENTIATORS

- Only off-the-shelf configurable solution that covers the entire waste lifecycle for nuclear, hazardous, and mixed waste
- Millions of dollars less expensive than developing an in-house system
- Proven adoption across highly regulated nuclear and environmental cleanup operations
- Configurable to meet local, national, and international regulations
- Long-term product continuity with senior technical staff exceeding 20 years of experience
- Pure software provider — not a logistics or physical waste-handling company, reducing liability and conflict of scope
